

Key benefits

- 1 Pleasant smell**
- 2 Versatile use**
- 3 Quickly dissolves ear wax**
- 4 Supports ear hygiene**

How should Omniotic be used?

Apply directly into the ear canal until massaging produces a characteristic sound. If you don't hear that sound during the massage, apply a little more.

Gently massage the base of the ear for a few seconds to obtain a good diffusion of the product. Omniotic can be used in dogs, cats and rabbits of any age.

Formulations

120 ml bottle with flexible tip

The only liquid for routine cleaning of the ears of dogs, cats and rabbits that combines all the features necessary to satisfy owners and vets at the same time.

Composition and actions of Omniotic

1. Removal of earwax and debris from the outer ear

PEG-40 Glyceryl Cocoate + Sodium Coco Sulphate	Non-irritating detergent
Propylene Glycol	Solvent in aqueous and oily media
Polisorbate 80	Emulsifier of oily or organic phase

2. Additional Actions

Octoxynol-9	Anti-viral and anti-bacterial non-ionic detergent
Imidazolidinyl Urea	Can be used with microbials
Lactic Acid	Bacteriostatic and fungistatic
Parabens	Broad spectrum bacteriostatic and fungistatic preservatives
EDTA	Buffer that balances the pH without affecting the efficacy of antibiotics (many topical agents are deactivated by the acidic pH of exudates and cleaning products)
Origanum Compactum (essential oil)	Essential oils which are anti-bacterial and anti-fungal
Salicylic Acid	Removes dead tissue and supports thickness of the epithelium, balancing the effects of corticosteroids
Melaleuca alternifolia (essential oil)	Supports the body's inflammatory system and assists skin regeneration
Lavandula angustifolia (essential oil)	Supports the body's inflammatory system and aids skin health
Aloe vera	Supports healthy skin

When should Omniotic be used?

Routine cleaning – apply weekly or fortnightly for perfect ear canal hygiene

Unpleasant odour – apply daily for 8 days, then apply every 2-3 days

Other situations - always after bathing, always after extracting ear hairs and before applying an ear treatment.

Directions for use

Accumulation of earwax

Use daily until no earwax is visible when cleaning, then continue to use every 2-3 days. Intervals between cleaning can continue to be increased to maintain optimum ear hygiene. For animals with a predisposition to accumulation of earwax bimonthly cleaning is recommended.

Supporting Ear Health

In addition to removing earwax and debris Omniotic has anti-fungal, anti-viral and anti-bacterial properties. As it contains EDTA it can be used alongside antibiotics or anti-fungal medications without neutralising their effects.
